 - I. Confirm the equipment for the procedure and ensure all equipment necessary to properly conduct the procedure is on site, immediately available for use and functioning properly.
 - II. In consultation with appropriate personnel, ensure all medical equipment, including an ultrasound machine for assistance with venous access and a backup electrocardiograph is on site, immediately available for use and functioning/calibrated properly.
 - III. In consultation with appropriate personnel, ensure that complete sets of chemicals are on site, not expired, and immediately available for use. ADCRR will only use chemicals in an execution that have an expiration or beyond-use date that is after the date that an execution is carried out. If the chemical's expiration or beyond-use date states only a month and year (e.g., "June 2017"), then ADCRR will not use that chemical after the last day of the month specified.
2. Upon receipt of the Warrant of Execution, the General Counsel shall ensure the chemicals are ordered, arrive as scheduled and are properly stored. The chemicals shall be stored in a secured, locked area that is temperature regulated and monitored to ensure compliance with manufacturer specifications, under the direct control of the Housing Unit 9 Section Leader.

The IV/Medical Team Leader shall be responsible for preparing and labeling the assigned sterile syringes in a distinctive manner identifying the specific chemical contained in each syringe by i) assigned number, ii) chemical name, iii) chemical amount and iv) the designated color, as set forth in the chemical charts below. This information shall be preprinted on a label, with one label affixed to each syringe to ensure the label remains visible.

C. Chemical Charts; Choice of Protocol

If the Department is able to obtain the chemical pentobarbital in sufficient quantity and quality to successfully implement the one-drug protocol with pentobarbital set forth in Chart A, then the Director shall use the one-drug protocol with pentobarbital set forth in Chart A as the drug protocol for execution. If the Department is unable to obtain such pentobarbital, but is able to obtain the chemical sodium pentothal in sufficient quantity and quality to successfully implement the one-drug protocol with sodium pentothal set forth in Chart B, then the Director shall use the one-drug protocol with sodium pentothal set forth in Chart B as the drug protocol for execution.

At the designated time, the overhead microphone will be turned on, and shall be left on until the completion of the execution, and the inmate will be brought into the execution room and secured on the table by the prescribed means with the inmate's arms positioned at an angle away from the inmate's side. Existing closed-circuit monitors will allow witnesses in the designated witness room to observe this process.
4. The inmate will be positioned to enable the IV/Medical Team Leader and the Housing Unit 9 Section Leader to directly observe the inmate and to monitor the inmate's face with the aid of a high resolution color camera and a high resolution color monitor.
5. After the inmate has been secured to the execution table, the Restraint Team Leader shall personally check the restraints which secure the inmate to the table to ensure they are not so restrictive as to impede the inmate's circulation, yet sufficient to prevent the inmate from manipulating the catheter and IV lines.
6. A microphone is outfitted in the execution room. The Administrative Team Leader will confirm that microphone is functioning properly, and that the inmate can be heard in the chemical room and in the witness room. In the event the microphone in the execution room is not functioning as intended, a microphone will be affixed to the inmate's shirt, and shall be left on until the completion of the execution, to enable the persons in the witness room and the IV/Medical Team to hear any utterances or noises made by the inmate throughout the procedure. The Administrative Team Leader will confirm the microphone is functioning properly, and that the inmate can be heard in the chemical room and in the witness room.
7. The IV/Medical Team members will attach the leads from the electrocardiograph to the inmate's chest once the inmate is secured. The IV/Medical Team Leader shall confirm that the electrocardiograph is functioning properly and that the proper graph paper is used. A backup electrocardiograph shall be on site and readily available if necessary. Prior to the day of, and on the day of the execution both electrocardiograph instruments shall be checked to confirm they are functioning properly and calibrated.
8. An IV/Medical Team member shall be assigned to monitor the EKG, and mark the EKG graph paper at the commencement and completion of the administration of the lethal chemical(s).
9. Throughout the procedure, the IV/Medical Team Leader shall monitor the inmate's level of consciousness and electrocardiograph readings utilizing direct observation, audio equipment, camera and monitor as well as any other medically approved method(s) deemed necessary by the IV/Medical Team Leader. The IV/Medical Team Leader shall be responsible for monitoring the inmate's level of consciousness.
10. Existing closed-circuit monitors will allow witnesses in the designated witness room to observe the IV/Medical Team's vein assessment and placement of IV catheters in the inmate. In addition, the audio feed from the overhead microphone and from the microphone affixed to the inmate's shirt shall remain on until the completion of the execution.

11. A camera will be focused on the area in the chemical room in which syringes are injected into the IV line, and existing closed-circuit monitors will allow witnesses in the designated witness room to observe the administration of the lethal injection drug(s), including the administration of additional or subsequent doses of the drug(s). All cameras and monitors shall be placed in such a manner so as to ensure and preserve at all times the anonymity of all personnel involved in the execution process.

E. Intravenous Lines

1. The IV/Medical Team Leader will determine the best sites to insert a primary IV catheter and a backup IV catheter in two separate locations in the peripheral veins utilizing appropriate medical procedures and will present that information to the Director. The Director acting upon the advice of the IV/Medical Team Leader shall determine the catheter sites. A femoral central line shall only be authorized if the IV/Medical Team is unable to insert IVs, and the person inserting the line is currently qualified by experience, training, certification or licensure within the United States to insert a femoral central line.
2. The IV/Medical Team members shall insert a primary IV catheter and a backup IV catheter. To ensure proper insertion in the vein, the assigned IV/Medical Team members should watch for the flashback of blood at the catheter hub in compliance with medical procedures.
3. The IV/Medical Team Leader shall ensure the catheters are properly secured and properly connected to the IV lines and out of reach of the inmate's hands. A flow of sterile saline solution shall be started in each line and administered at a slow rate to keep the lines open.
4. The primary IV catheter will be used to administer the lethal chemical(s) and the backup catheter will be reserved in the event of the failure of the first line. Any failure of a venous access line shall be immediately reported to the Director.
5. The IV catheter in use shall remain visible to the Housing Unit 9 Section Leader throughout the procedure.
6. The Housing Unit 9 Section Leader shall physically remain in the room with the inmate throughout the administration of the lethal chemical(s) in a position sufficient to clearly observe the inmate and the primary and backup IV sites for any potential problems and shall immediately notify the IV/Medical Team Leader and Director should any issue occur. Upon receipt of such notification, the Director may stop the proceedings and take all steps necessary in consultation with the IV/Medical Team Leader prior to proceeding further with the execution.
7. Should the use of the backup IV catheter be determined to be necessary, a set of backup chemicals should be administered in the backup IV.

F. Administration of Chemicals – One-Drug Protocol

1. At the time the execution is to commence and prior to administering the lethal chemical, the Director will reconfirm with the Attorney General or designee and the Governor or designee that there is no legal impediment to proceeding with the execution. Upon receipt of oral confirmation that there is no legal impediment, the Director will order the administration of the chemical to begin.
2. Upon receipt of the Director's order and under observation of the IV/Medical Team Leader, the IV/Medical Team Leader will instruct the assigned IV/Medical Team member(s) to begin dispensing the chemicals under the chosen drug protocol.

3. Upon direction from the IV/Medical Team Leader, the assigned IV/Medical Team member will visually and orally confirm the chemical name on the syringe and then administer the first syringe of the sterile saline solution, followed by the full dose of the lethal chemical immediately followed by the sterile saline solution flush.
4. When three minutes has elapsed since commencing the administration of the lethal chemical, the IV/Medical Team Leader, dressed in a manner to preserve their anonymity, will enter into the room where the Housing Unit 9 Section Leader and inmate are located to physically confirm the inmate is unconscious by using all necessary medically appropriate methods, and verbally advise the Director of the same. The IV/Medical Team Leader will also confirm that the IV line remains affixed and functioning properly.
5. If, after three minutes, the inmate remains conscious, the IV/Medical Team shall communicate this information to the Director, along with all IV/Medical Team input. The Director will determine how to proceed or, if necessary, to start the procedure over at a later time or stand down. The Director may direct the curtains to the witness viewing room be closed, and, if necessary, for witnesses to be removed from the facility, only in the event of a legitimate penological objective which would merit such closure and/or removal.
6. If deemed appropriate, the Director may instruct the IV/Medical Team to administer an additional dose of the lethal chemical followed by the sterile saline solution flush. This may be administered via the primary or backup IV catheter, as determined following consultation with the IV/Medical Team.
7. Upon administering the lethal chemical and sterile saline solution from a backup set, the IV/Medical Team shall determine whether the inmate is unconscious by sight and sound, utilizing the audio equipment, camera and monitor. The IV/Medical Team Leader will again physically determine whether the inmate is unconscious using proper medical procedures and verbally advise the Director of the same.
8. When all electrical activity of the heart has ceased as shown by the electrocardiograph, the IV/Medical Team Leader will confirm the inmate is deceased and the inmate's death shall be announced by the Director.
9. The Recorder shall document on the Correctional Services Log the start and end times of the administration of the lethal chemical.
10. Throughout the entire procedure, the IV/Medical Team members and the Housing Unit 9 Section Leader shall continually monitor the inmate using all available means to ensure that the inmate remains unconscious and that there are no complications.
11. The curtains to the witness room will be closed and the closed-circuit monitors will be turned off following the pronouncement of death.

G. Contingency Procedure

1. An Automated External Defibrillator (AED) will be readily available on site in the event that the inmate goes into cardiac arrest at any time prior to dispensing the chemicals; trained medical staff shall make every effort to revive the inmate should this occur.
2. Trained medical personnel and emergency transportation, neither of which is involved in the execution process, shall be available in proximity to respond to the inmate should any medical emergency arise at any time before the order to proceed with the execution is issued by the Director.

3. If at any point any team member determines that any part of the execution process is not going according to procedure, they shall advise the IV/Medical Team Leader who shall immediately notify the Director. The Director may consult with persons deemed appropriate and will determine to go forward with the procedure, limited to the option provided in Attachment D, §F(6), or to stand down. If the Director determines to stand down, then trained medical staff shall make every reasonable effort to revive the inmate.
4. There shall be no deviation from the procedures as set forth herein, except as expressly allowed herein. There shall be no deviation from the procedures as set forth herein without prior consent from the Director. Although such consent may be verbal or in writing, the Director must memorialize and maintain a written record of having granted any deviations, which record must include a detailed description of the deviation, the basis for the deviation, and the basis for the Director's consent thereto.

H. Post Execution Procedures

1. Upon the pronouncement of death, the Director shall notify the Governor or designee and the Attorney General or designee via telephone that the sentence has been carried out and the time that death occurred.
2. An IV/Medical Team member will clamp and cut the IV lines leaving them connected to the inmate for examination by a Medical Examiner.
3. A Criminal Investigations Unit Investigator and a Medical Examiner will take photos of the inmate's body:
 - While in restraints prior to being placed in the body bag,
 - Without restraints prior to being placed in the body bag,
 - Sealed in the body bag, and
 - A photo of the seal in place on the bag.
4. The inmate's body will be placed on a Medical Examiner's gurney and released into the custody of a Medical Examiner's Office.
5. Once the inmate's body is placed in a Medical Examiner's transport vehicle, it will be escorted off the premises. The Medical Examiner's transport vehicle will take the inmate's body to the Medical Examiner's Office designated by the county.

I. Documentation of Chemicals and Stay

1. In the event that a pending stay results in more than a two-hour delay, the catheters shall be removed, if applicable, and the inmate shall be returned to the holding cell until further notice.
2. The Correctional Service Logs, the list of identifiers and the EKG tape shall be submitted to the Department's General Counsel, upon completion of the execution, for review and storage.

J. Debrief and Policy Review

1. The Administrative, Restraint, and IV/Medical Teams will participate in an informal debriefing immediately upon completion of the event.
2. Upon an assignment to a Team, team members shall review DO #710, Execution Procedures.

3. Periodically, and in the discretion of the Director, a review of DO #710, Execution Procedures along with this attachment may be reviewed to confirm it remains consistent with the law. General Counsel shall advise the Director immediately upon any change that may impact these procedures.

ATTACHMENT E

LETHAL GAS

1. Approximately 10 minutes before the execution, Chemical Operators #1 and #2 shall sequentially pour 6 QUARTS OF DISTILLED WATER and 5 PINTS OF SULPHURIC ACID into the mixing pot (9). THE WATER SHOULD BE Poured FIRST. UPON COMPLETION OF POURING THE WATER, 5 PINTS OF SULFURIC ACID SHOULD BE Poured NEXT. RUBBER GLOVES AND GLASS FUNNEL SHALL BE USED. THE ACID MUST BE Poured SLOWLY TO PREVENT SPLATTERING. This mixture should remain in the mixing pot (9) for approximately 10 minutes so as to attain an adequate mix and maximum temperature. Keep away from acid fumes and possible splatter caused by boiling. This mixture will yield a 41.5% concentration.
 - Chemical Operator #1 shall ensure that the mixture shall not pass to the chair receptacle until after the Chamber door is closed and instructions received from the Chamber Operator.
 - The Caustic Soda Neutralizing solution shall be prepared by Chemical Operator #2 immediately after the completion of the acid mixture.
 - Chemical Operator #2 shall put on rubber gloves and dissolve 1 pound of CAUSTIC SODA into 2½ gallons of water already in a pour-spout can. Once the mixing process is complete, this solution should be kept near the mixing on the floor in close proximity to the mixing pot (9).
 - Chemical Operator #2 shall dissolve 30 grains of Phenolptalein Solution in 4 ounces of alcohol. If the solution is pre-mixed, then skip this step.
 - Chemical Operator #2 shall relay to the Housing Unit 9 Team Leader that the chemical mixing process is complete.
 - The Housing Unit 9 Team Leader will notify the Director that the chemical mixing is complete and the chamber is ready.
 - The Director will instruct the Housing Unit 9 Team Leader to move the inmate to the chamber.
2. The inmate shall be brought into the execution room and placed in the Chamber and strapped in the chair by the Restraint Team. The internal Chamber microphone will be turned on and a microphone will be affixed to the inmate's shirt and also turned on; both microphones shall remain on until the completion of the execution (the microphones will remain on during any last statement by the inmate, but will be turned off in the event the inmate uses vulgarity or makes intentionally offensive statements; if the microphones are turned off, they will be turned back on immediately after the completion of the last statement) to enable the persons in the witness room and the Housing Unit 9 Team Leader to hear any utterances or noises made by the inmate throughout the procedure. The Housing Unit 9 Team Leader will confirm that the microphones are functioning properly and that the inmate can be heard in the operations room and in the witness room.

- a. Closed-circuit monitor(s) will allow witnesses in the designated witness room to observe this process and shall remain on until the completion of the execution. All cameras and monitors shall be placed in such a manner so as to ensure and preserve at all times the anonymity of all personnel involved in the execution process.
3. Chemical Operator #2 shall place 4 petri dishes containing the Phenolptalein Solution inside the chamber so as to be clearly visible to the Chamber Operator. (Location should be at each designated corner of the chamber.)
4. After the inmate is strapped in the chair, Chemical Operator #2 shall verify that the petri dishes containing Phenolphthalein are still in their proper place.
5. Chemical Operator #2 shall inspect the GAS VALVE LEVER (1) and GAS VALVE POT (10) to ensure that it is dry and in the Closed position. Once this is confirmed, Chemical Operator #2 shall place the sodium cyanide packets in the GAS VALVE POT (10) under the chair.
6. Chemical Operator #2 and the Chamber Operator shall close the Chamber door and ensure that it is properly sealed.
7. The Chamber Operator shall ensure that the fan damper is in the closed position. Once this is confirmed, the chamber fan shall be activated and left on.
 - The manometer H pressure gauge readings on the chamber shall be monitored to determine air tightness of Chamber.
 - The Chamber will be considered air-tight if the manometer gauge to the right has a higher reading than the left.
 - If the readings on both the manometer H gauges remain equal, the Chamber Operator shall notify the Housing Unit 9 Team Leader immediately.
8. The Chamber Operator shall position themselves at the GAS VALVE LEVER (1).
9. The Chamber Operator shall ensure that the Outlet Valve (4) is closed. This Outlet Valve (4) shall remain closed until the chamber is cleared.
10. Chemical Operator #2 shall proceed back to the Chemical preparation room.
11. The Housing Unit 9 Team Leader shall notify the Director that the chamber is ready.
12. Chemical Operator #1 and the Chamber Operator shall release the mixed acid and water from the mixing pot (9) into the Gas Generator by opening the Acid Mixing Pot Valve (Red lever) and Inlet Valve (3). Chemical Operator #1 shall visually observe the liquid drain from the mixing pot. Once fully drained, Chemical Operator #1 shall close the Acid Mixing Pot Valve and place it in the Closed Position.
13. Chemical Operator #1 shall notify the Chamber Operator that the acid mixture is fully drained.
14. The Chamber Operator shall close the inlet valve (3) and advise the Chemical Operators when complete.

15. Chemical Operator #2 shall fill the mixing pot (9) with the Caustic Soda solution.
16. The Chamber Operator shall then advise the Housing Unit 9 Team Leader that the Chamber is ready for use.
17. The Housing Unit 9 Team Leader shall notify the Director that everything is ready to proceed. The Director shall make the final notifications to the Attorney General.
18. The Director shall instruct the Chamber Operator to remove the locking pin of the GAS VALVE LEVER (1) (Sodium Cyanide immersion lever) and open the immersion valve, to drop the pellets into the acid in the gas generator. The Gas Valve Lever (1) shall remain open until the clearing process of chamber is initiated.
19. With the Chamber in operation, the Housing Unit 9 Team Leader will observe and inform the Recorder as necessary. A member of the IV/Medical Team shall monitor the Inmate and EKG and shall advise the Director when the inmate has expired, providing the corresponding time of death.
20. The Director will announce that the execution has been completed. The Housing Unit 9 Team Leader will instruct the Operators to “Clear the Chamber”.
 - NOTE: The length of time required shall be determined by a member of the IV/Medical Team and the Housing Unit 9 Team Leader. It is recommended that this period should be no less than 10 minutes.
21. When the Housing Unit 9 Team Leader announces “Clear the Chamber”, the Chamber Operator shall move the exhaust fan damper lever (5) into the open position.
22. The Chamber Operator shall close the GAS VALVE LEVER (1) into the closed position for clearing.
23. Chemical Operator #1 and the Chamber Operator shall drain the Caustic Soda Solution into the gas generator. Chemical Operator #1 shall open the Acid Mixing Pot Valve (9). The Chamber Operator shall open the Inlet Valve (3) and allow caustic soda to fully drain into the gas generator.
24. Chemical Operator #1 shall monitor the CAUSTIC SODA SOLUTION until the Acid Mixing Pot is fully drained and empty.
25. Once the Acid Mixing Pot (9) is empty, Chemical Operator #1 shall close the mixing pot valve (Red Valve) and instruct the Chamber Operator to close the Inlet Valve (3).
26. The Chamber Operator shall inform the Chemical Operators once the Inlet Valve (3) is closed.
27. The Chemical Operator shall fill the mixing pot with water.
28. The Chamber Operator shall open the air manifold intake lever (2), which may be opened with graduated steps.
29. The Chamber Operator shall open the Outlet Valve (4), opening the gas generator drain valve first, and then opening the Inlet Valve (3).
30. Once the Inlet and Outlet Valves are fully open, the Chamber Operator shall inform the Chemical Operators to begin flushing.

31. The Chemical Operators shall open the water faucet, allowing additional water to flow into the mixing pot (9).
 - The Chemical Operators shall observe the drainage of water from the mixing pot to ensure that the flushing is proceeding properly. During this period, the Chamber Operator shall perform the following functions:
 - a. The Chamber Operator and Chemical Operator #1 shall fully open the anhydrous ammonia tank valve, then open ammonia control valves (7) and (8) (on the regulators) gradually to reach the saturation to allow the effective neutralization of the residual chemicals in the chamber, gas generator and plumbing. After 30 seconds, both Operators shall close the ammonia tanks in the following sequence: The tank valves shall be closed first, and, after approximately 30 seconds, the regulator valves (7) and (8) shall be closed. This will allow the ammonia to drain from the piping. Anhydrous ammonia valves should be CLOSED OUT AT LEAST THREE MINUTES BEFORE OPENING THE CHAMBER DOOR.
 - b. After the Chamber is completely evacuated of gas and purged of the ammonia fumes, the phenolphthalein in the petri dishes should turn red (pinkish) in color. This color change is an indication that the Chamber door may be safely opened. A member of the IV/Medical Team and Restraint Team now may enter, using masks for protection from any residual ammonia fumes. The Chamber Operator shall close the air valve lever (2).
 - CAUTION: Although smoke tests suggest that the Chamber is purged in approximately 3 to 5 minutes, it is recommended that the period between opening the exhaust and air inlet valves and opening the Chamber door be about 15 minutes. As a precautionary measure, it is recommended that the Physician and the Restraint Team removing the body wear hydrocyanic acid gas masks or approved respirators and rubber gloves and that the hair of the deceased inmate be ruffled in order to allow any residually trapped gas to escape. Close the Chamber door, but not tightened more than contact with the gasket, and aerate for one hour as necessary to clear any residual ammonia.
32. The Restraint Team shall hose down all the surfaces and the deceased inmate prior to removal from the chair.
